

ECO SYSTEM PARTNERS

Providing Complete Manufacturing Solutions

Micromatic has always offered customers with unmatched pre-sales, post sales & life-time service support. In addition, we now have the complete manufacturing eco-system to offer complete protection to your capital investment, while also ensuring that your CNC m/cs deliver maximum productivity

Micromatic Machine Tools is the face of customer service for Ace Micromatic Group, India's largest machine tool group. It has helped customers set new paradigms in productivity through innovations and interactions. MMT has developed a one-stop super shop for total customer support, by interfacing the technological excellence of the manufacturing units with the customer's desire for higher productivity and profits.

These include Application Engineering, Commissioning and Training, Tech centres, Continuous Monitoring of Product Performances & Annual Maintenance Contracts (AMC).

Customers are served through the extensive and widely spread Sales and Service network across 60+ locations, eight technology centres and a strong team of 500+ trained engineers spread across the country.

MMT provides its customers with affordable CNC technology and close hand-holding which is why over 60% of its customers place repeat orders every year.

Who are Eco System Partners

Micromatic believes in assisting customers beyond the traditional and narrow outlook of just the machine supply. We are aware that there are several products and consumables required to enable the CNC m/c cut metal efficiently. We have therefore partnered with best in class manufacturers to address these needs of the shop floor, thereby ensuring that our customers achieve machining with lowest cost per component. Be it power stabilizers, lubricants, grease, tool holders, inserts or an online solution to help you get more orders, our Eco system partners help you productionize faster and better.

Why Eco System Partners ?

With our eco system partners, we reduce the number of touch points for a customer. Micromatic can be your single point contact for a wide array of your shop floor requirements. We reduce the customer's lead time to actually start cutting metal. Our eco system partners have been carefully chosen after extensive testing across our machine range to ensure optimum performance and reliability.

BILZ

Bilz, is a leading supplier of precision tool holding system that are used worldwide in many different areas of application and on almost all types of machines. Bilz's success is due to a continual process of innovation, new product development enhancement of existing product Range.

Established in Germany during 1919 and have subsidiaries in USA, UK, France, Italy, India and China with a dedicated work force of over 500 skilled and experienced technical individuals in Europe and Asia. Bilz, a leading manufacturer of clamping tools worldwide in the fields of

tapping & high-performance tools, as well as being a competent partner in the automotive & machine tool industry for over 90 years.

Bilz India Pvt. Ltd is a subsidiary of BILZ Werkzeugfabrik GmbH & Co.KG, Germany, started its operations in 1989, manufacturing high precision holding systems for Tapping, Drilling and Reaming.

Our expertise:

Alongside our high manufacturing standards, Bilz also attaches great importance to intensive application support and customer service.

Many tools are developed individually to suit the customer's requirements. BILZ can now offer complete solutions and not just the actual tool.

Bilz - fit for the future.

- ThermoGrip - Shrink-Fit Machines & Shrink-Fit Holders
- Tapping Chucks & Quick Change Drilling Chucks
- Microbore - Boring Solutions

Product

- Tool Holders - BT40/BT50/BT30/HSK - A63.
- ER Spring Collets & ERD Sealed collets
- Tapping adaptor and chucks
- Thermo Grip - Shrink Fit Units & Holders

CADEM

Cadem is India's leading provider of CNC machining software for the manufacturing industry. Its range of industrial products for Machine monitoring, CAD/CAM and CNC Training are enabling shop floors to improve the productivity of their CNC machines.

CADEM's CNC machining software products are extremely easy to use and are designed for use by shop floor personnel including operators. Cadem's conversational CAD/CAM systems can give you an edge over your competitors

Software for reducing cycle time & automatic programming

CAPSturn / CAPSmill reduces cycle times and programming time. It enables you to take on complex

first-time-off programs and 100% accurate cycle time calculations are guaranteed. Makes your business competitive and profitable. No need to learn G/M code programming

Software for CNC Education & Skill Development in corporates

profiCNC is a complete solution for skill development in CNC machining. It is an integrated system that is perfectly aligned with

Product

CNC Software for Industry

- CAPS Turn
- CAPS Mill
- NC net

CNC Software for Education

- NCyclopaedia

- seeNC
- CAMLab

CLEANOIL

From the perspective of the total productivity, effective machine cleaning industry, the lack of a

can hamper the efficiency systems, affect a healthy working environment and grossly reduce the value and life of machines. CleanOil was developed as a structural solution to this problem.

CleanOil is a potent formula developed for metal surfaces, although it is useful for other hard surfaces as well. It produces excellent results both, as an individual sump and a central system cleaning product.

Why cleanoil

- CleanOil has been thoroughly researched and developed with a team of engineers with decades of industrial experience.

- Highly diluted solution that efficiently combats oil stains on metal surfaces by rapidly emulsifying tough oil build-ups.
- The 1000ml liquid concentrate retail packaging makes it an affordable and smart choice for industries.

- CleanOil is a human and environment friendly solution, free from solvents and hazardous elements like Sodium Hydroxide and Butyl.

- With a 1:10 concentrate to water ratio, CleanOil is the most cost effective industrial oil stain remover in the market.

Features of cleanoil

- CleanOil is a much more effective, specialized and profitable alternative to domestic stain removers.
- A single kit of CleanOil is enough to clean and maintain a mid sized CNC machine for an entire year

- The CleanOil Kit is a complete, ready-to-use cleaner kit comprising of a liquid concentrate bottle, a spray bottle and heavy duty scrubs.

- The innovative packaging used ensures correct dilution of the product and ease of use.

- Our efficient system guarantees quick delivery and product support for our customers.

Product

- Clean Oil Kit - Aggressive stain remover.

ELGI

With close to 60 years of experience in manufacturing air compressors, ELGi is a global leader in providing sustainable compressed air solutions. ELGi designs and manufactures an extensive range of innovative advanced technologies for a variety of industry applications. The company collaborates with clients to understand their changing needs and designs solutions accordingly. Long-term partnering has been the key differentiating factor.

ELGi established in 1960, designs and manufactures a wide range of air compressors.

The company has gained its reputation for design and manufacture of screw compressors through strategic development. Over the years, continuous research and development has emerged as a multi-product, multi-market enterprise providing total compressed air solutions in all segments.

Technology is a driving force at ELGi. ELGi belongs to the league of the top five global players that possess the technological capability to design and manufacture oil-free screw air compressors. Our technology is focused not just on the compressor

packages but as much on the air ends, that form the heart of compressors.

ELGi has its own manufacturing operations in India, Italy and USA with subsidiaries in Australia, Brazil, UAE and Indonesia. The company is fast expanding its global footprint attracting distributors and customers with its latest generation products.

The company has ISO 9001:2015, ISO 14001:2015, ISO 45001:2018,

ISO 5001, Green Product Certified

Product

- Reciprocating type Compressors - 5 HP, 7.5 HP, 10 HP, 15 HP, LD series.
- Screw type Compressors - 5 HP, 7.5 HP, 10 HP, 15 HP
- Dryers and Filters

FUJI ELECTRIC

Fuji Electric Consul Neowatt is fully owned by Japan based Fuji Electric, a global power electronics and energy major. Fuji Electric started direct operations in India in 2009.

Fuji Electric in India today has three modern manufacturing facilities located in Chennai, Pune and Bhiwandi that are ISO 9001:2015, ISO 14001:2015 & ISO 45001:2018 certified. The company's R&D facility is approved by the Department of Scientific and Industrial Research, Ministry of Science and Technology, Government of India.

Fuji Electric has an installed base of over 400,000 units in India and supports customers through 25 sales

locations and with one of the largest pan India service networks covering 80+ locations with more than 400 factory trained service engineers.

The company today offers customers a wide range of products including Three Phase UPS, Single Phase UPS, Active Harmonic Filters, Solar Inverters, Servo Stabilizers, AC Low Voltage Drives, AC Medium Voltage Drives, Servo Systems, HMI, Motion Control, Factory and Process Automation, Power Instrumentation and more to customers in India, Middle East and Africa.

- 30+ Years of field experience in developing solutions for critical equipment & applications.

- 1000+ MW of power backup & power conditioning products delivered.

250K+ Installations across India, Middle-East, Africa and Asia.

- 90+ Customers with more than 1MW of our products and solutions.

Product

- Stabilizers – 15kVA, 20kVA, 25kVA, 40kVA, 50 kVA, 75 kVA, 100 kVA.
- Centralized UPS.
- Harmonic Filters.

KRYKARD

Atandra Energy Pvt. Ltd., based in Chennai, India, is built on a platform of over 35 years' experience in the area of Power and Energy management.

At Atandra, we are proud to be associated with many firsts in the industry. Being the first to introduce the range of 'LOAD MANAGERS' in India, or the Digital Voltmeter on the Servo Stabilisers with an unmatched 'No-Questions- Asked'

Guarantee, the KRYKARD brand has carved a niche for itself and is a preferred choice for most industrial and commercial establishments.

Our core philosophy of Measure - Protect - Conserve has been designed to provide comprehensive solutions for energy conservation and sustainability.

The Company offer solutions to industrial and commercial establishments under our popular brand KRYKARD. With over 4,00,000 installations of Power Conditioners and over 1,50,000 installations of Portable and Panel Load Managers, KRYKARD is one of the leading brands in India, in the area of Energy Management.

- An ISO 9001:2015 Certified factory
- CE Certified Power Conditioning

Product

- Stabilizers – 15 kVA, 20 kVA, 25 kVA, 40 kVA, 50 kVA, 75 kVA, 100 kVA
- Centralized UPS
- Harmonic Filters

FINANCE

Driving industrial productivity with equipment finance solutions

To cater to dynamic market demands, it is vital for manufacturers to be equipped with the latest technology. A major challenge to equipment purchase is access to funds. Our NBFC partners enable manufacturers acquire assets, by providing affordable financing options and issuing in-principle approvals, typically within 48 - 72 hours.

Financial solutions to drive business

Our select Non-Banking Financial

partners (NBFCs) enhance your competitiveness, generate greater value and provide a solid foundation for growth. They support your investments by offering project finance, leasing solutions, structured finance, and advisory services. Ace Micromatic can also offer "Rental Solutions" to meet short term machine needs.

Machine Loan

Machine Loans help you buy new machinery without collaterals in

an easy and simple way. You can purchase machines like VMC, CNC lathe, CNC grinding, Laser cutting, 3D printing and SPMs through this loan. However, large down payments financial strain and ties up capital.

If you intend using an asset at full capacity and assuming proper maintenance, you will be able to extract maximum life-cycle value from it. Ownership also allows you to, claim tax deductions for related depreciation, insurance, interest and repair expenses.

Finance (Capital) Lease?

In a finance lease, NBFC purchases and owns the asset that customer wishes to acquire, and then leases it to you. You pay the cost of the equipment, interest and charges during the agreed term of the agreement, via regular payment. When the lease term ends, you can choose either to keep the equipment at agreed residual value or return it.

With leased assets, you can avoid making large down payments and reserve capital for other purposes. The responsibility of maintenance lies on the lessee. Customer can avail tax efficiencies on full lease

rentals. Further off-balance sheet and off debt classification is possible in books of accounts.

Renting CNC Machine Tools can be a

Renting offers the most flexibility, allowing you to pay for only the equipment you need for a limited period. There is no big down

payments and considered a tax-deductible operating expense. Renting also frees you from responsibility for maintenance and repairs. However, renting is costlier and may increase your overall expenses

Product

- Equipment Finance
- Equipment Operating Lease
- Equipment Financial Lease
- Short term renting
- New entrepreneur scheme

MOBIL™

ExxonMobil has been at the forefront of lubrication technology innovation for more than 150 years. As one of the leading lubricant manufacturers, ExxonMobil offers a complete range of industrial lubricants to cater to the different needs in the market. With years of proven performance, these lubricants are expertly formulated to meet the challenges faced by both large and small enterprises of a rapidly developing country like India.

Mobil™ India is committed to delivering machine shop lubricants that cater to your industry's specific

needs and keep your shop running at top efficiency.

We understand that importance of efficiency in a industry like yours. Our machine shop lubricants are designed to reduce the downtime on cutting oils maintenance and repairs with a protection that maximises productivity.

Whether your machine shop manufactures simple fasteners or complex gear sets, precision manufacturing, tool life and uptime are critical to your success and profitability.

After many decades serving the industry, we have the lubricants and expertise to help you every step of the way.

In addition to our high-performance metalworking lubricants and fluids, we provide a range of technical services to help keep your machine shop running at peak efficiency while also extending machine and oil life, reducing downtime and lowering operating costs.

Product

- Hydraulic Oil - Nuto H68 AW 68. (Available standard pack - 50 ltrs, 218 ltrs)
- Lubrication Oil - Vactra Oil No. 02. (Available standard pack - 20 ltrs, 208 ltrs)
- Coolant Oil - Mobil Cut - 100,220,250 (Available standard pack - 20 ltrs, 210 ltrs) -
- Spindle Oil Mobil Velocite No. 03 & 06. (Available standard pack - 20 ltrs)
- Gear Oil - Mobilube HD 85W140 (Available standard pack - 5 ltrs, 1 ltr)

OKS

Tribology is the great passion of OKS. Nothing has changed since the 1970s. With passion, many years of know-how and in close teamwork, high-performance lubricants are manufactured. Active environmental and occupational safety is a matter of course.

Customers from industry, craft, manufacturing and processing industries worldwide appreciate the high quality and reliability of the products. Especially in critical and heavy applications of systems and machines, friction problems are reduced safely and reliably.

Lubrication of the Chuck

- Most of the chucks fail to perform due to lack of lubrication resulting in faster chuck base jaw wear out, loss of gripping force to maximum extent and even lead to accuracy of components.
- Normally chuck greasing is recommended for every shift of operation considering normal cycle time of components being produced.
- Normal phenomenon of Grease does not allow free and proper movement of base jaw which calls for disassembly of chuck.

How and where to Lubricate

Grease gun filled with grease are used to lubricate through grease nipples provided on the Chuck periphery ensuring easy flow of grease into the base jaws.

Frequency of Lubrication

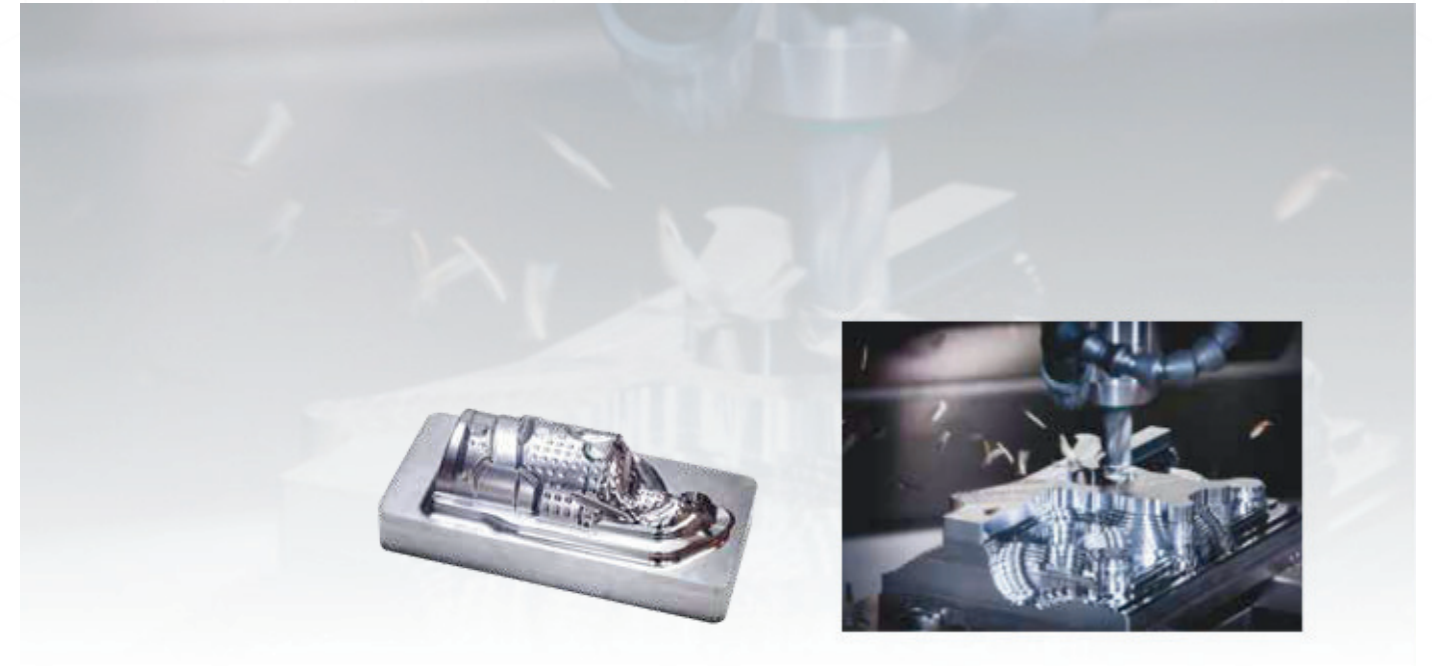

Operation of 500 to 1000 cycles and time of operation of 8 to 16 hours whichever is earlier.

Dismounting Frequency

First dismantle at 5000 to 8000 cycles of operation subsequent dismantling of 20000 to 25000 cycles. If In case of cast iron machining Suggested frequency of chuck disassembly to be once in a month.

Product

- Kluber OKS 265

SOLIDCAM

SolidCAM leaders in Integrated CAM

Founded in 1984 SolidCAM has over 30 years of expertise in CAM development and applications.

SolidCAM is the leading Integrated CAM software which runs directly inside SolidWorks, with seamless integration and full tool path associativity.

SolidCAM is the only CAM with the unmatched, patented I Machining solution, and also supports Milling and Turning functionality, with powerful support for advanced Mill- Turn Machines, including Swiss-Type.

- Provides a Complete CAM Solution for all CNC applications

- Works right inside your existing CAD: Seamless integration in both SOLIDWORKS and Autodesk Inventor Saves time & frustration: Eliminates import export challenges
- Gets you up to speed fastest: Extremely short learning curve because you're already familiar with SolidCAM's interface since it runs right inside your CAD system

- Get the full picture: SolidCAM works in the CAD assembly mode to graphically show Fixtures, Tooling & Vices in simulations

- SolidCAM grows as you grow: SolidCAM is scalable with packages for all CNC machine types and applications

- SolidCAM gives you the most for your money: The integrated CAD CAM-Solution SOLIDWORKS +Solid CAM is available at a competitive bundle-price

Complete CAM solution, seamlessly integrated in SOLIDWORKS

SolidCAM runs directly inside your existing SOLIDWORKS CAD system, with seamless integration and full tool path associativity - design changes initiate automatic tool path updates to the CAD model. With the single-window integration, all machining operations can be defined and verified without leaving the parametric CAD assembly environment you're already used to

Product

- Integrated CAD/CAM solution that supports the complete range of major manufacturing applications, including
- iMachining2D, iMachining 3D, 2.5D Milling
- High Speed Surface Milling
- 3D Milling/High-SpeedMachining, Multi-sided Indexical 4/5 axes Milling, Simultaneous 5 axes Milling
- Swiss Type Solution for Sliding Head Automats and Solid Probe

SPHOORTI

SphoortiMachine Tools Pvt. Ltd. was incorporated in the year February 1996. Over the years the company has undergone many stages of developments to emerge as one of the India's leading manufacturers of Tool Discs and Tool Holders for CNC Turning Centers and Turn Mill Centers.

Our philosophy is to offer our

customers tooling and accessories to increase the efficiency of their machining operations by reducing both set-up and cutting times.

We strive to provide high quality products at competitive prices. It is also our policy to maintain sufficient stock levels to be able to offer quick deliveries of standard off-the-shelf items.

With our depth of knowledge in the CNC field, we can help with your standard and special CNC tooling applications. We are specialized in manufacturing a variety of Slotted Tool Discs & Holders for CNC turning and turn mill centers.

Features:

- Made out of Forged, Medium carbon steel & Toughened to 20+ 2 HRC.
- Finish machining on precision machining centres to ensure accuracies.
- Suitable for fitment on both flat and slant bed CNC lathes.
- Customised design can be supplied on request.

Product

- Slotted Tool Discs - Tool Holders
- Driven Tool Holders
- Double Serration - Through Coolant - VDI - Tool Holder
- BMT Tool Holders
- VTP Tool Holders
